eCH-1234 Template Quarto Document

August 12, 2026

Abstract Brief summary of the purpose of the document.

Note

This document uses a gender-neutral formulation when referring to persons. This is based on the guidelines (German) of the Federal Chancellery. Depending on the situation, paired forms (citizens), gender-abstract forms (insured person), gender-neutral forms (insured person) or paraphrases with-out personal reference are used. The generic masculine (citizen) is not permitted. Full forms are used in continuous texts, i.e. in texts consisting of formulated sentences. Short forms can be used in ab-breviated text passages, namely in tables. The short form is used with a slash but without an ellipsis (referent). Gender asterisks and similar spellings are not used.

Introduction

Status

Approved: This document was approved by the Experts' Committee. It has normative power for the defined field of application in the determined scope of application.

Scope of application

The information in this chapter should provide the reader with a brief overview of what this standard is intended for. Information about the following matters may be helpful here.

We can have sub-headings

And write some text.

Also sub-sub-headings

And write some more text. Maybe even with a pretty image.

Figure 1: Always add some text to describe what the image shows.

When displaying diagrams, try to write them in Mermaid JS straight away; this makes changes in the future or translations straightforward.

Technical notes

We use the ROBOT CLI in our project [1], especially for it's ability to run the HermiT reasoner [2].

Data Model

Genre

Target Class: `:Genre`

Table 1: Genre properties

Description	Path	Type	Cardinality
Name	`schema:name`		1..1
Part of	`schema:partOf`	:Genre or `sh:IRI`	0..*

Invoice

Target Class: `schema:Invoice`

Table 2: Invoice properties

Description	Path	Type	Cardinality
Customer: An invoice must be linked to exactly one customer.	`schema:customer`	schema:Person	1..1
Total Payment Due: An invoice must define a total payment due as a schema:QuantitativeValue.	`schema:totalPaymentDue`	schema:QuantitativeValue	1..1
Has Part: An invoice must have at least one line item (OrderItem).	`schema:hasPart`	`schema:OrderItem`	1..*
	`schema:dateCreated`	`xsd:date`	0..*

Music album

Target Class: `schema:MusicAlbum`

Table 3: Music album properties

Description	Path	Type	Cardinality
Name: Every album must have a name.	`schema:name`	`xsd:string`	1..1
Artist: Person or music group who created the album.	`schema:byArtist`	schema:Person or `schema:MusicGroup`	0..*

Music Recording

Target Class: `schema:MusicRecording`

Table 4: Music Recording properties

Description	Path	Type	Cardinality
Name: Every track must have a name.	`schema:name`	`xsd:string`	1..1
In Album: A track can only belong to a valid schema:MusicAlbum.	`schema:inAlbum`	schema:MusicAlbum	0..*
	`schema:author`		0..*
Genre	`schema:genre`	:Genre	1..1
Duration: Track duration must be expressed as a schema:QuantitativeValue.	`schema:duration`	schema:QuantitativeValue	0..*
	`schema:contentSize`	schema:QuantitativeValue	0..*

Organisation

Target Class: `schema:Organisation`

Table 5: Organisation properties

Description	Path	Type	Cardinality
Name: Every organisation must have a name.	`schema:name`	`xsd:string`	1..1

Person

Any person (employee, customer, or custom person) present in the dataset.

Target Class: `schema:Person`

Table 6: Person properties

Description	Path	Type	Cardinality
Given Name: Every person must have a given name.	`schema:givenName`	`xsd:string`	1..1
Family Name: Every person must have a family name.	`schema:familyName`	`xsd:string`	1..1
Email Address: If an email is provided, it must follow a standard email format.	`schema:email`	`xsd:string`	0..*
Birth date: A person should have a valid birth date.	`schema:birthDate`	`xsd:date`	0..*
	`schema:address`	`schema:PostalAddress`	0..*
An employee can report to another person.	`schema:worksFor`	schema:Person or `schema:Organization`	0..*
Job title	`schema:jobTitle`		0..1
knows	`schema:knows`	schema:Person	0..*

Quantitative Value

Target Class: `schema:QuantitativeValue`

Table 7: Quantitative Value properties

Description	Path	Type	Cardinality
Value: A quantitative value must have exactly one numeric value.	`schema:value`		1..1
Unit Code: A quantitative value must specify its unit via a unitCode URI.	`schema:unitCode`	`sh:IRI`	1..1

Safety considerations

Information about the explicitly relevant legal bases or a note that during the implementation the rele-vant legal bases must be observed.

Disclaimer

eCH-standards which the registered association eCH provides the user free of charge or which make reference to eCH shall only have the status of recommendations. The registered association eCH will not be liable in any event for any decisions made or measures taken by the user based on these documents. The user will be responsible for verifying the documents himself prior to their use and to seek advice if required. eCH-standards can and shall not replace the technical, organizational or legal advice in the individual case.

Documents, procedures, methods, products and standards that are made reference to in eCH-standards are possibly protected by trademarks, copyrights or patents. It is the exclusive responsibility of the user to obtain the necessary licences from the entitled persons and/or organizations.

Although the registered association eCH has taken adequate care to prepare the eCH-standards with due diligence, it cannot grant any warranty or guarantee that the information and documents provided are up-to-date, complete, true or without any errors. eCH reserves the right to change the contents of the eCH-standards at any time and without prior announcement.

Any liability for damage caused by the use of the eCH-standards by the user shall be excluded to the extent legally admissible.

Copyrights

Persons preparing eCH-standards shall remain the owners of their intellectual property rights. These persons, however, obligate themselves to provide their intellectual property rights or other rights in third party intellectual property rights, to the extent possible, to the relevant technical units and the registered association eCH for free and for unlimited use and further development as part of the purpose of the association.

The standards prepared by the technical units can be used, distributed and developed further for free and to an unlimited extent by stating the name of the respective author of eCH.

eCH-standards are fully documented and free of any restrictions of licence and/or patent law. The associated documentation can be requested for free. These provisions shall apply to the standards prepared by eCH only, however, not to any standards or products of third parties which include reference to eCH-standards. The standards include the relevant references to third party rights.
